

Jason Victor

Miami, FL | (786)-7029986 | jasonvic97@gmail.com | github.com/Jasonvic97 | Jasonvictor.online

SUMMARY

IT professional with experience supporting enterprise data systems, leading technology operations, and building modern web applications. Skilled in troubleshooting hardware and software, Windows and Linux environments, networking fundamentals, Microsoft 365, and cloud technologies. Experienced in managing live production technology, developing responsive websites with React and Next.js, and delivering dependable technical solutions in fast-paced environments.

EXPERIENCE

Junior Database Analyst

July 2022 – March 2023

Embraer

- Maintained enterprise databases while ensuring data accuracy and integrity.
- Created reports and analyzed operational data using Microsoft Excel.
- Investigated and resolved data discrepancies to improve business operations.
- Collaborated with cross-functional teams to support production systems.

Church Media Operations Lead (Volunteer)

5+ Years

- Lead audiovisual, livestream, and technology operations for weekly services and large events.
- Configure and troubleshoot cameras, computers, presentation software, streaming hardware, and network-connected equipment.
- Train volunteers on technical systems and provide technology support for multiple churches and denominations.
- Diagnose and resolve hardware, software, and connectivity issues under time-sensitive conditions.

Dispatcher

March 2023 – March 2025

Miami-Dade Fire Rescue

- Operated multiple computer systems simultaneously in a mission-critical environment.
- Managed high-volume information with exceptional accuracy, organization, and problem-solving.
- Coordinated communication between departments while maintaining strict attention to detail.

PROJECTS

Personal Portfolio Website | React, Next.js, TypeScript, Tailwind CSS

- Designed and developed a fully responsive portfolio website showcasing technical projects and experience.
- Used Git and GitHub for version control and modern development workflows.

Linux Home Server

- Built and administered an Ubuntu server using Docker and SSH.
- Configured networking, user management, and self-hosted services to strengthen Linux administration skills.
